Notes: Prior to 1992 and after 2004, creel surveys only were conducted at some of the 8 standardized creel locations. For this reason, most of the following graphs only include data for 1992-2004. Another full-scale creel survey (similar to those conducted during 1992-2004) is scheduled for 2010. Unless otherwise indicated, graphs do not include data from the charter boat fishery.
